TITLE : MEDICAL DOUBLE-CHAMBER
CONTAINER

ABSTRACT : PROBLEM TO BE SOLVED: To provide a medical double-chamber container capable of certainly mixing medicines housed in respective housing parts to administer the medicine mixture to a patient and capable of certainly preventing an accident administering the medicines to the patient by mistake without mixing the medicines.

SOLUTION: The medical double-chamber container is equipped with first and second housing parts 10 and 11, a partitioning weak seal part 20 for partitioning both housing parts 10 and 11, the medicine discharge port 32 connected to the second housing part 11 and a discharge weak seal part 21 for partitioning the second housing part and a medicine discharge port 32. A liquid medicine is housed in at least one of both housing parts 10 and 11, and the partitioning weak seal part 20 and the discharge weak seal part 21 are opened by increasing pressure in both housing parts 10 and 11 and pressure necessary for opening the discharge weak seal part 21 is larger than pressure necessary for opening the partitioning weak seal part 20.
